

# ADVANCING TEAMS IN COMMUNITY HEALTH PROGRAM

A 10-month program to build leadership, strengthen teams, and support improvement capacity at community health centers in Massachusetts.

## ABOUT

The Advancing Teams in Community Health Program (ATP) is a 10-month professional development program offered by the Harvard Medical School Center for Primary Care. The aim of ATP is to strengthen teams, build leadership, encourage continuous improvement and increase provider, staff, and trainee satisfaction in order to improve patient outcomes.

## BENEFITS OF PARTICIPATION:

- ✓ Monthly virtual sessions dedicated to improvement and leadership development skills
- ✓ One on one coaching on an improvement project of the health clinic's choice
- ✓ Three in-person team learning sessions
- ✓ A \$20,000 stipend to support staffing and program related travel

***"I enjoyed and appreciated that the team was able to come together, and be provided with a structure and things to consider to reach a common goal."***

***- ATP Cohort Two Participant***

## WHO IS ELIGIBLE?

- ✓ CHCs with an identified interdisciplinary group of team members. (may include physicians, nurses, medical assistants, social workers, behavioral health therapist, patient partners, patient navigators, or other roles relevant to the project selected)
- ✓ CHCs with executive leadership support
